

HOW TO...

KEEP IT CLEAN

Removing scale from taps, sinks, floors, your shower, the toilet, ... should be easy with these (topped up with some patience and practice off course).

TIP: steel wool sponges are meant to rub a lot, really a looooot, but not for hard and short scratching

Getting hobs clean again or tackling stubborn (grease) stains is easier when having some of these at hand.

Oh yes, and here too: rubbing is a must

Dust off, remove bits of dirt, quick fixes, ...? Use these
And ... keep rubbing

And last, but definitely not least: vacuuming still is the finishing touch, right?

Do you prefer to have less chemicals? Have a look at the website of Ecopods.be or Brauzz.be or stop by at the Content store in Leuven (at the back side of the railway station)
